

Scottish Farm Business Income 2022-23

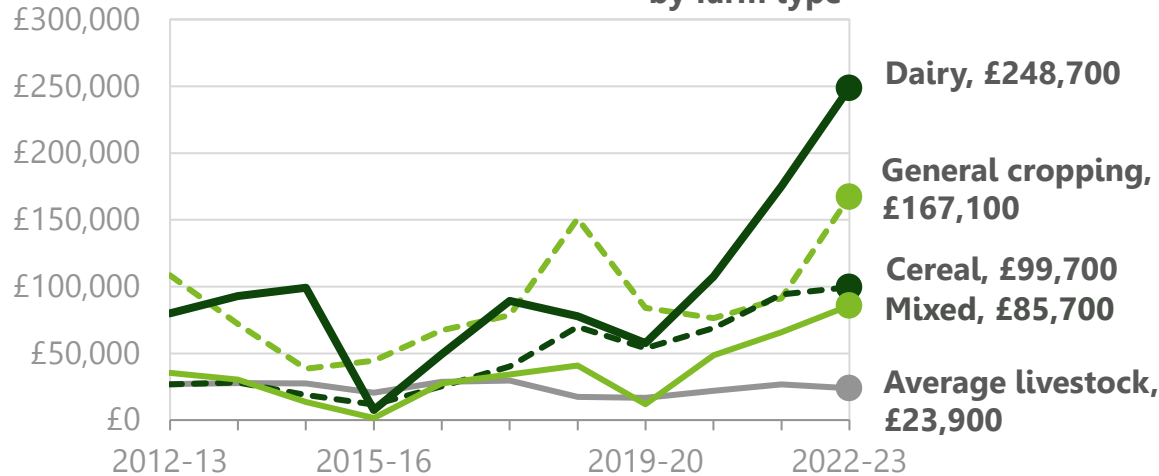

Average farm income 2022-23

In 2022-23 the average farm...

by farm type

Farm business income measures farm profit (income from farming, diversification and support payments, minus costs) available to people who draw money from the business. Estimates cover commercial farms that receive support payments and do not cover horticulture, poultry, or pig farms. Farm types indicate the largest enterprise on each farm. Values are in 2022-23 prices. Minimum agricultural wage (MAW) is the weighted average over the calendar year, accounting for rate change at the start of the financial year. In 2022 MAW is estimated at £9.35 per hour.
