- Table S7 - Calculation of SINA
- Table S8 – Indicator Importance
- Table S9 – Example Calculations
- Table S10 – List of distribution changes

# 1 Introduction and Background

## 1.1 Context

This report details the methodology, data, and calculations that are central to the Scottish Government's distribution of revenue funding between Scotland's 32 local authorities, for financial year 2024-25. Any methodological or data changes since the 2023-24 local government finance settlement are also explained.

Grant Aided Expenditure (GAE) and Special Islands Needs Allowance (SINA), are the first steps in the calculation of the General Revenue Funding (GRF) which each local authority receives annually from the Scottish Government.

The subsequent steps in the calculation of GRF involve taking into account income that local authorities receive from specific grants, Council Tax and Non-domestic Rates. These additional details are set out in Local Government Finance Circular No 2/2024.

An overview of the process is available in The Funding of Local Government in Scotland published each year on the Scottish Government website.

## 1.2 What is GAE?

GAE is the needs-based methodology used to allocate the pre-determined Spending Review funding totals equitably amongst local authorities, based on a 'client-group approach' (described in next section). The individual sub-service totals are referred to as 'lines' (for example, the Primary School Teaching Staff GAE line) and each has its own methodology to calculate the allocations for each local authority.

Until the 2024-25 settlement, the term GAE referred to the historical funding lines covering about £8 billion of support that had remained fixed from 2007-08 until the 2020-21 settlement. There were also funding lines referred to as redeterminations and others that were Former Ring-fenced Grants (FRFGs), amounting to a further £3 billion. Since 2020-21 the distinction between these different categories has diminished and as there is, from 2024-25, now no distinction between them, they are all now referred to as GAE.

Once all GAE lines have been calculated, they are summed to give totals for each local authority.

It is important to note that the individual service allocations are not budgets or spending targets; they are simply an allocation methodology designed to distribute the overall levels of resources to be made available in a way that takes into account all relevant indicators of need. They are not intended to be used by local authorities to allocate resources. The decisions about the amounts allocated to individual services are made entirely by the local authority

on the basis of local needs, having first fulfilled its statutory obligations and the jointly agreed set of national and local priorities.

Special Islands Needs Allowance (SINA) is an allocation for local authorities with island populations. Broadly speaking, SINA adds about 12 per cent onto the total GAE for island authorities or populations, but excluding any of those funding lines that already take account of islandness in their distribution formula.

Any additional general support is then distributed in proportion to the sum of GAE and SINA for each authority.

Other allocations provide support for servicing outstanding debt and PPP projects.

A funding floor is then used to provide protection against most year-on-year changes, whether that be due to year-on-year changes in the funding formulae or due to historical levels of support being higher than that received from the formula. Once all relevant funding lines have been calculated, a lower limit is set on the percentage change that any authority can receive compared to the previous year. Those authorities above that limit pay into a pool which is then used to lift those below the limit up to the floor. In recent years the floor was set at 0.25 per cent below the Scotland average, but in 2024-25 this was set at 0.50 per cent below the average. Certain funding lines, such as those funded by specific grants, those where changes are being transitioned over a few years, and most new money, are excluded from the calculation of the floor.

### **1.3 The client-group approach (i.e. methodology)**

The client-group approach is an objective method used to estimate, within a controlled total, the relative allocation to local authorities. It is designed to take into account variations in the demand for services and the costs of providing them to a similar standard and with a similar degree of efficiency. Central to the approach is the identification of factors associated with inter-authority expenditure variation.

Statistical data describing the 'clients' that are understood to benefit from each individual GAE service are used to achieve this; for example, the number of school pupils is used as an indicator of expenditure on school teaching staff.

In addition, other demand and cost factors which are also outwith the control of local authorities, which offer plausible explanation for, and which can be shown or can be logically argued to be associated with inter-authority expenditure variation are used as indicators. Examples of these include indicators of population dispersion (i.e. rurality) and deprivation.

All indicators must be factors which plausibly affect either the demand for services or the unit cost of meeting that demand. They were selected after thorough discussions with local authorities and other service specialists.

In some cases, a pair or group of indicators can be shown to be clearly correlated with inter-authority variations in expenditure. In such cases, the size of the allowance made for each indicator may be derived mathematically from the relationship between past expenditure and the indicators. For instance, the GAE for primary school teaching staff, which is mainly based on pupil numbers, also has a factor which takes account of the higher ratio of staff to pupils in rural areas.

For the 2024-25 calculations, all such dual indicators have been tested against the latest available expenditure data from the 2021-22 Local Financial Returns that the Scottish Government collects from local authorities. The data were then adjusted to update them from the year of analysis of past expenditure to the year for which GAE is being estimated. Finally, in the interests of stability, they are averaged with the weights used in the previous 2023-24 settlement.

Composite indicators are single indicator expressions which encompass a number of factors, each considered to be plausibly associated with inter-authority variation in expenditure, and are often used to include a more complex mix of factors.

The client group approach used is well established, and much of the methodology is unchanged between settlements. A full description of the Client Group Approach is provided in [Finance Circular 11/1992](#). The methodology for Dual Indicator Reviews has however been adjusted, so that both indicators are now tested for significance (see section 2.2 of the 2020-21 Green Book).

## **2 Changes Since the Last Settlement**

### **2.1 Comparison to 2023-24 settlement**

The needs-based indicators used in assessments have, where possible, been updated to use the most up-to-date data available, though a few elements are fixed, for example, some of the more detailed 2011 population census data.

A few lines have merged, and some individual totals have not remained at the same levels as the 2023-24 settlement.

### **2.2 Terminology**

As stated above, there has been a change in terminology for 2024-25. Whereas previously funding lines were classified as either GAE, redeterminations, or FRFGs, the lack of any distinction between these now has resulted in the classifications being unnecessary and unhelpful. All funding lines are now therefore referred to as GAE.

## **2.3 Data issues**

The Data Issues Working Group (DIWG) is the technical advisory group, comprising of representatives of the Scottish Government and local government (including COSLA), which exists to assist the analytical work undertaken in support of the allocation calculations. The work programme of the DIWG is directed by the Settlement and Distribution Group (SDG), which was established to oversee all matters relating to the local government finance settlement. Data issues dealt with through the DIWG, and agreed by the SDG, since the last settlement are listed below.

### **Dual Indicator Review 2023**

The Dual Indicator Review is undertaken for two reasons. The first is to establish whether or not pairs of indicators currently used in the settlement calculations, and determined mathematically, continue to be valid by displaying a statistically significant relationship with past expenditure. The second is to produce updated regression coefficients – the measure of the relationship between expenditure and the indicators – for use in the next Settlement. The coefficients determine the amount of funding distributed on each indicator.

Of the eight GAE lines distributed by this methodology in the previous settlement, seven returned significant values to confirm that the expected relationships still exist. The eighth, Consumer Protection, did not show a statistically significant relationship between the indicators and past spend. It was therefore agreed to roll forward the weights used in the 2023-24 settlement.

### **2022 Population Census data**

None of the Census data usually used in the settlement had yet been made available at the time of the 2024-25 settlement. Work on the Census caused the delay in publishing the 2022 mid-year estimates and so the 2022 Census-day population estimates were used for most of the population indicators. However, as these were only published in five-year bands, only those that fitted with the age-bands used in the settlement were used. In other cases the 2021 mid-year estimates were rolled forward, with the relevant cohort adjustment (i.e. where the 16-year old population was needed, the 15-year old population from 2021 was used). The tables below state in each case which population data have been used.

### **Child Deprivation indicators**

Concerns were raised that the previously used Children in Low Income Families (cilif) data were seemingly excluding a considerable number of families who were on benefits, but whose health-related benefits resulted in them being above the threshold. This related particularly to two authorities. Newly available data on the number for children in receipt of Scottish Child Payment (SCP) were therefore introduced, in most cases alongside the more focussed cilif data, on a 50:50 basis, though for School Meals and School Clothing Grant only SCP data were used as more accurately reflecting the wide spread of these services. For Access to Sanitary Products - Public Bodies the relevant cut of SCP data were not available and so only cilif data were used.

### **Standardised Mortality Ratios**

The use of Standardised Mortality Ratios had previously been excluded from two of the Elderly Care Composite Indicators (though not from the third) for those aged 85+, due to concerns that the small numbers involved meant the data were unreliable. Since that decision in 1997, the 85+ category has increased by around 50 per cent in both population and deaths, and is now larger than other age-bands. The use of SMRs for 85+ has therefore been reintroduced, as recommended in the initial report.

### **Rurality Indicators**

Whereas the main rurality indicator (percentage of the population living outwith settlements of size 1,000) is usually only updated every ten years when new Population Census data become available, NRS now more regularly publish settlement data which can be used to create more frequent updates. The 2020 estimates were therefore used to create rurality indicators used for 2024-25.

For two GAE lines, Changing Children's Services Fund and School Crossings, similar indicators were created just using child populations.

### **School Meals**

Additional support for the phased expansion of universal free school meals to P6 and P7 has been added to the P6/P7 free meals element of the School Meals GAE line, resulting in an adjustment to the weights on each element, which are otherwise based on the breakdown of recent spend.

### **Removal of distinction between GAE and other lines**

Two lines in the revenue settlement (National Priorities and Centres for Excellence) were based on total Education GAE lines (and so not the previous redeterminations and FRFGs), and so are now based on all Education-related funding lines. The Cities Growth Fund in the capital settlement also changed from being based just on the previous GAE lines to now being based on all funding lines.

### **Access to Sanitary Products - Public Bodies**

The deprivation indicator used changed from all adults on work-related benefits, to female children in low income families aged 12+ and females on IS/JSA/UC up to age 54.

### **Fire Injury Payment and Police Transfer**

As both of these lines were recognised as no longer related to local government spend, the amounts were merged into the changes column.

Supplementary Table 9 gives a list of the changes to formulae and methodology made during 2023.

## **2.4 Local Authority naming convention**

Please note that City of Edinburgh and Na h-Eileanan Siar have been placed in their alphabetical order, which differs from the order used in the Finance Circular.

## **3 Settlement Checking Process**

The remit of the Settlement and Distribution Group stated that the group feed into the checking of the local government finance settlement prior to publication. A major part of this checking relates to the GAE calculations to ensure that all the relevant indicators have been updated and the correct methodology applied. The checking took place during one month from late-December, during which time local authority and COSLA officials were given full access to the provisional calculations.

## **4 Guide to the Tables**

Section 1 shows broad service level totals (i.e. education, social work, roads and transport etc.) for 2024-25.

Section 2 shows the 2024-25 calculations by sub-service heading. For each service heading all indicators are shown and indicator notes, definitions and sources are brought together to allow as much detail as possible in a single place, and under a single heading. Table notes may refer to Supplementary Tables where further background data have been used in the construction of a particular indicator (for example population adjustments and construction of the composite indices). Individual lines may have been re-ordered since last year to place lines for similar client-groups together.

Section 3 shows similar 2024-25 calculations for the Capital Grant. These tables are also available in the excel spreadsheet.

An excel spreadsheet version of the tables which contains formulas showing the calculations is available online at the following link.

Notes:

- Modelling for this support line uses a number of different indicators for client count, deprivation and rurality. See Supplementary Tables

- Data taken from Pre-school Census (Sept 2023), Children in low income families (DWP 2021-22 data), Scottish Child Payment (Sept 2023), SIMD, and 2020 estimates of rurality.

Notes:  
 - Pupil Numbers: Scottish Government Pupil Census 2023  
 - Pupils in Small Rural Schools: Pupils in primary schools of less than 70, in settlements in Scottish Government urban / rural classifications 5 and 6 (Source: Scottish Government Education Analytical Services Directorate)  
 - Percentage weightings are determined using regression, comparing the variables with latest spend data.

Notes:  
 - Pupil Numbers: Scottish Government Pupil Census 2023  
 - Percentage weighting has been fixed since GAE 2001-02, though were adjusted in 2022-23 to account for the inclusion of data on island schools in mainland authorities

Notes:  
 - Population Data: National Records of Scotland (NRS) Mid-Year Estimates 2021, aged 1-18 rolled forward.

Notes:  
 - Primary School Free Meal Registration: this is the number of P5-P7 or P6-P7 pupils in the top 10% of schools ranked by the percent of pupils registered for free school meals, expressed for each authority as a percentage of all Scottish P5-P7 or P6-P7 pupils in the top 10% (averaged over three years).  
 - Secondary Registered for Free School Meals: the same approach is applied except that pupils in schools ranking in the top 5% attract a weighting of 4, between 5% and 10% attract a weighting of 3 and between 10% and 20% attract a weight of 1.  
 - Source: Scottish Government Pupil Census 2020, 2021 and 2022.  
 - Primary and Secondary allocation shares of total are kept the same as in previous settlement years. - Primary and secondary allocation shares of total are kept the same as in previous settlement years.

Notes:  
relates to a transfer from the previous Schools Fund Capital Grant into the revenue settlement to fund PPP payments.

Notes:  
Relates to funding for schools public private partnership funding until 2032.

Notes:  
- Hostel Places (filled or unfilled) and number of pupils

Notes:-  
- Pupil Numbers and Establishments: Scottish Government Pupil Census 2023 and Pre-School Education Census 2023  
- Establishments are the number of Local Authority run premises that cover Pre-school, Primary, Secondary and Special sectors

Notes:  
- A Youth Crime share, of £15m, is also allocated in proportion to Community and Residential Care for Children but with a minimum allocation of £60,000. Both of these figures have then been scaled up due to the merger with the Youth Justice redetermination (to £19.392m and £78k respectively).

Notes:  
- Population Data: National Records of Scotland (NRS) Mid-Year Estimates 2021, aged 0-17 rolled forward.  
Percentage population living outwith settlements of size 1,000 (Source: NRS Mid-Year 2020 settlements), applied to latest population estimates.

**Scottish Recommended Allowance for Kinship & Foster Care**

**2024-25**

includes previous Kinship Care support, and £16m in new support for SRA in 2024-25

Notes:  
- The composite primary indicator for Services for the Home Based Elderly GAE is a population weighted index constructed using standardised mortality ratios, population census long term limiting illness and living alone information as well as Pension Credit claimant data. For more information please see Supplementary Tables.

Notes:  
- The composite primary indicator for Residential Accommodation for the Elderly GAE is a population weighted index constructed using standardised mortality ratios, population census long term limiting illness and living alone information as well as council tax data. For more information please see Supplementary Tables.

Notes:  
- Based on the GAE for Services for the Home Based Elderly and Residential Accommodation for the Elderly

**Personal & Nursing Care for Older People**

Notes:  
 - Road Length and Parking Data: Annual Return to Transport Scotland 2023.  
 - kms of LA road length (April 2023) multiplied by number of lanes, and weighted (Principal Road x 1.0, Non Principal Road x 0.5, Peat roads x 1.0). A weighting of 0.442 is applied to lane length available for parking. Includes road built on peat.  
 - Road usage statistics, excludes trunk roads. Weighted in proportion to average weight (tonnage) of a vehicle type. Usage data from Transport Scotland, 2018-2021.  
 - Percentage weightings are determined using regression, comparing the variables with latest spend data

Notes:

- Off Road Paths (length in metres): Scottish National Heritage, Scottish Path Records, 2006 data.
- Population: uses NRS Census 2022 and Census 2011 data. Population is calculated by applying the 2011 proportion of population not living in a national park to Census 2022 population for each authority.
- There is a 50:50 split between population and total length of off -road paths (excluding national parks), adjusted to ensure a minimum allocation of £70,000.

Notes:  
 - Dwellings Valued for Council Tax: SG Statistical Support for Local Government (CTAXBASE return 2023)  
 - Population Dispersion: This is a measure of the degree to which the population of an authority is spread across its area in relation to (main) settlements. Main settlements are defined for this purpose generally as being those of 7,000 or more. The dispersion indicator is then calculated as the sum of the distances for the relevant population outwith those main settlements to travel to the nearest main settlement.

Notes:  
 - Adjusted population (NRS Census 2022). Adjusted for in-commuters and tourists. For calculation details see Supplementary Tables.

Notes:  
 - Adjusted population (NRS Census 2022). Adjusted for in-commuters and tourists. For calculation details see Supplementary Tables.

Notes:  
 - Adjusted population (NRS Census 2022). Adjusted for net commuters and tourists. For calculation details see Supplementary Tables.  
 - Combined Indicator using Road Density and Area Deprivation, as follows:-  
 - Road Density: Adjusted population per km of road length, weighted by urban road length as a proportion of total road length. Source: Annual Return to Transport Scotland 2023.  
 - Area Deprivation: Scottish Index of Multiple Deprivation proportion of LA data zones falling within the most deprived 20% of all Scotland data zones. Source: Scottish Government SIMD 2020  
 - Percentage weightings are determined using regression, comparing the variables with latest spend data.

Notes:  
 - Composite indicator includes various indicators of likely need for private sector house grants, based on data from the Scottish House Condition Survey 2016-2018, and the Scottish House Condition Survey 2012. Please see Supplementary Tables for more details.  
 - Population Dispersion: This is a measure of the degree to which the population of an authority is spread across its area in relation to (main) settlements. Main settlements are defined for this purpose generally as being those of 7,000 or more. The dispersion indicator is then calculated as the sum of the distances for the relevant population outwith those main settlements to travel to the nearest main settlement.

Notes  
 - Population Data: NRS Census Estimates 2022.  
 - Rural Settlement Pattern: Percentage of LA population living in settlements of less than 1,000 (Source: NRS Mid-Year 2020 settlements). Settlements within 1km of each other are merged. Percentages multiplied by latest population estimates.

Notes  
 - Distribution formula includes a fixed element, population, released prisoner numbers and registered social landlords.

Notes:

- Homelessness: Number of households in temporary accommodation, scaled by availability of social lets. Social lets: number of social lets to homeless, scaled by availability of social lets. See supplementary table 4.
- Household Dispersion: This is a measure of the degree to which the households in an authority are spread across its area in relation to (main) settlements. Main settlements are defined for this purpose generally as being those of 7,000 or more. The dispersion indicator is then calculated as the sum of the distances for the relevant population outwith those main settlements to travel to the nearest main settlement. This average distance is then applied to the number of households.
- Income deprivation, and Households in 15 per cent most deprived datazones : Scottish Index of Multiple Deprivation 2020.
- House Price Index: Affordability of house prices, scaled by population size. Rent price index: Affordability of renting, scaled by population size. See Supplementary tables 4.

Notes:

- Number of Current Income Deprived: the count of adults and their dependants in receipt of Income Support, Employment and Support Allowance, Job Seekers Allowance, Guaranteed Pension Credits, and Child and Working Tax Credits. SIMD 2020 Income Domain.

- A minimum allocation for each authority of £85,000.

Notes:

- SIMD indicator uses three indicators based on SIMD 2020 data. The allocations are adjusted to ensure a minimum allocation of £500,000. Please see Supplementary Tables for more details.

Notes:

- Population Data: National Records of Scotland (NRS) Mid-Year Estimates 2021, aged 0-16 rolled forward.

Notes:  
 - Population Data: NRS Census Estimates 2022.  
 - SIMD indicator uses three indicators based on SIMD 2020 data. Please see Supplementary Tables for more details.  
 - Island population: NRS Mid-Year Estimates 2021 for the three island local authorities and North Ayrshire, a 2021-based best-estimate for Argyll & Bute, and 2011 Census data for Highland. Excludes islands connected to the mainland by a bridge. Includes peninsula communities not connected by road.

Notes:

Notes:  
 - Population data: NRS Census Estimates 2022  
 - Crime statistics: all incidents 2022-23, Scottish Government  
 - Income deprivation: Scottish Index of Multiple Deprivation 2020

Notes:  
 - Pupil Numbers Source: Scottish Government Pupil Census 2023 and Pre-School Education Census 2023.  
 - Urban Settlement Pattern: Percentage of LA population living in settlements of greater than 10,000 (Source: NRS Mid-Year 2020 settlements). Settlements within 1km of each other are merged. Percentages are then multiplied by the latest pupil numbers.  
 - Percentage weightings are determined using regression, comparing the variables with latest spend data.

Notes:  
SIMD data 2020

Notes:  
- Disabled population estimate: Scottish Government Annual Population Survey, 3-year average 2019, 2021 and 2022.  
- Population Dispersion: This is a measure of the degree to which the population of an authority is spread across its area in relation to (main) settlements. Main settlements are defined for this purpose generally as being those of 7,000 or more. The dispersion indicator is then calculated as the sum of the distances for the relevant population outwith those main settlements to travel to the nearest main settlement.

Notes:  
 - Population : uses NRS Census estimates for 2022.  
 - Road Length and Parking Data: Annual Return to Transport Scotland 2023.  
 - kms of LA road length (April 2023) multiplied by number of lanes, and weighted (Principal Road x 1.0, Non Principal Road x 0.5, Peat roads x 1.0). A weighting of 0.442 is applied to lane length available for parking. Includes road built on peat.

Notes:  
 - A fixed amount of the original grant has been transferred to the revenue settlement for 14 authorities. See Revenue settlement.

Notes:  
- Share of AADs rolled forward  
- SEPA schemes are funded in priority order. May be negative where project previously funded ahead of new scheduled timetable for work.

Notes:  
- Amount of urban vacant and derelict land out of use since at least 2004 (sites over 100ha removed) - 25%  
- National share of local authority land in 15% most deprived data zones across all domains of SIMD 2016 - 50%  
- Estimate of Number of People living in close Proximity to Long Term Derelict Land - 25%  
- Awards made to top five ranked authorities

Notes:  
- Adjusted population (NRS Census 2022).  
Adjusted for in-commuters and tourists. For calculation details see Supplementary Tables.
